# Introduction

Welcome to this “Lift the Flap” book! On each page, you will find lots of information about some busy places in everyday life.

The world around you is a busy and exciting place!

Find out more by looking under the flaps. See what goes on inside a hospital, and on a farm. Look inside a film studio to see the set in action. Take a peek at some animals hidden away at the zoo. Can you find a rhinoceros?

Cities are very busy places. There are lots of cars, lorries and buses creeping along the streets. The pavements are crowded with people going shopping or walking to work. Cities can be very noisy places, too. You can always hear the revving of car engines, the squeaking of brakes and the beeping of horns. But if you listen carefully enough, you might also hear market traders shouting out what they have to sell.

A building site is a very noisy place! Engines rumble, saws whirr and drills whine. Heavy lorries arrive with their loads of girders, bricks and concrete slabs. A concrete mixer churns concrete into the pump. From there, it slurps into the foundation pit.

Men shout instructions to one another as the crane hoists girders up to the upper floors of the new building. Meanwhile, bulldozers and diggers clear away rubble.
